The Small Physician's Practice Route to ICD-10 Orientation
"Packing your Bags for the Journey to ICD-10"

This in depth workshop series targets practices of any size and their staff members to help guide them through the transition from ICD-9 to ICD-10. It uses a modular approach to help practices build their individual Action Plans and put them in motion.

Plan Your Journey: Tonight we "Pack our Bags" to prepare for the Journey to ICD-10 by helping to walk participants through preparing their Action Plan using CMS' www.roadto10.org.

Train Your Team: During this Workshop our goal is to assist practices in effectively using the tools and training resources provided to help get offices started on the path to ICD-10 compliance.

Update Your Processes: Workshop #3 is aimed at assisting practices in using the specific action steps for updating policies, procedures, forms and templates to ensure that the necessary increased detail in clinical documentation required by ICD-10.

Engage Your Vendors & Payers: Assessing the approach vendors and payers will be using with ICD-10 is a crucial part of the transition. This Workshop will help to provide the tools to guide practices through these critical assessments.

Test Your Systems & Processes: Our final Workshop is centered around providing the steps to outline the system and process to test vendors and payers and to direct practices to options and resources to test ICD-10 coding and validate the supporting clinical documentation processes that have been created.

Each participant will receive a binder to collect/store information that will be received at each of the 5 workshops. It is imperative that you attend each of the workshops to have access to the entire plan.
